SUMMARY

Android developer with **3+ years of professional experience** delivering native Android and Kotlin Multiplatform applications, complemented by 4+ years of independent app development and architectural experimentation. Skilled in **Kotlin, Jetpack Compose, Clean Architecture, multi-module systems, and Kotlin Multiplatform**, with hands-on experience sharing business logic across Android and iOS. Experienced across the development lifecycle, including feature delivery, testing, code review, bug fixing, crash investigation, and architecture refactoring on production multi-module codebases. Effective cross-functional collaborator with **UI/UX, QA, backend, iOS, and product management teams** in Agile/Scrum environments.

TECHNICAL SKILLS

- Languages:** Kotlin, Java, Swift
- Mobile Development:** Android SDK, Kotlin Multiplatform, Jetpack Compose, ViewModel, LiveData, XML, SwiftUI
- Architecture:** Clean Architecture, MVVM, MVI, MVP, Modularization
- Async & Data:** Kotlin Coroutines, Flow, REST APIs, Room, SQL
- Dependency Injection:** Dagger, Dagger Hilt, Koin
- Networking:** Retrofit2, Volley, OkHttp, Ktor
- Tools & DevOps:** CI/CD (Jenkins, GitLab, Bitrise), Firebase, Google Play Console, Android Studio, Xcode
- Testing:** TDD, Unit Testing, MockK, JUnit, Mockito, UI Testing
- Methodologies:** Agile/Scrum, Jira, Confluence, Git, Code Review

EXPERIENCE

Middle Android Developer <i>Confidential Client – Full-time Contract (NDA)</i>	<i>Mar 2025 – Jun 2026</i> <i>Tashkent, Uzbekistan</i>
Energy Management App: Contributed to a large-scale native Android application for electricity and gas customers, covering consumption tracking and analytics, billing and payments, personalized energy insights, smart-meter connectivity, tariff optimization, and customer services. Compose Migration & Stabilization: Joined a large Android codebase mid-migration, progressing from XML-to-Compose migration tasks to broader feature and engineering responsibilities within a Clean Architecture, MVVM, multi-module project. Feature Delivery & Engineering Ownership: Delivered features and resolved cross-layer issues across UI, data, and domain layers, taking responsibility for unit testing, code reviews, merge requests, crash investigation, and architecture refactoring within a production multi-module codebase. Secure API Integration: Integrated authenticated REST APIs with robust token refresh, domain-layer abstractions, and resilient error handling. Cross-Functional Delivery: Collaborated daily with UI/UX, QA, backend, iOS, and product management teams in an Agile/Scrum environment while refactoring shared modules to improve maintainability and stability.	
Middle Android Developer <i>Softonic Global (formerly Softonic Uzbekistan) – Full-time</i>	<i>Nov 2024 – Mar 2025</i> <i>Tashkent, Uzbekistan</i>
ELD Platform Development: Continued development of 3 ELD telematics platforms after Softonic Uzbekistan directly engaged the delivery engineering team following the Green Light ELD handoff. Bug Resolution Across Platforms: Resolved critical cross-platform defects on Android and iOS, contributing to a 20% improvement in app stability and user satisfaction. Code Refactoring for Maintainability: Refactored core shared modules, reducing code complexity by 25% and reinforcing long-term maintainability. UI Enhancements: Designed and implemented responsive, user-friendly UI components, driving a 20% increase in user engagement and usability scores. Navigation Feature Development: Integrated advanced mapping and navigation functionality, including real-time location tracking.	

Middle Android Developer

Green Light ELD – Full-time

Sep 2024 – Oct 2024

Tashkent, Uzbekistan

- **ELD Telematics Delivery:** Joined an ELD telematics initiative through the Green Light ELD team, contributing to mobile development and IoT device integrations for commercial trucking and logistics operations.
- **Hardware Integration:** Implemented low-level SDK integrations for IoT/ELD hardware, including Bluetooth device communication and data-synchronization layers.
- **Release Management:** Published and managed production releases across the App Store and Google Play, coordinating release activities to maintain stability and compliance under a compressed delivery timeline.
- **Production Support:** Investigated and resolved complex production issues spanning mobile and device layers, collaborating closely with the backend team on end-to-end reliability.
- **Client Transition:** Following a successful delivery, the client engaged the engineering team directly, continuing the project under Softonic Uzbekistan.

Android Developer

TaffHub – Full-time

Jun 2023 – Nov 2023

Russia (Remote)

- **Production Application Development:** Built production Android applications that improved user engagement and retention.
- **Cross-Functional Collaboration:** Collaborated closely with product, design, and backend teams to deliver production-ready features and strengthen application stability.
- **Performance Optimization:** Improved application responsiveness through systematic profiling, testing, debugging, and code optimization.
- **Client Delivery:** Delivered projects ahead of schedule, earning consistently positive client feedback.

PERSONAL PROJECTS

Independent Android / Kotlin Multiplatform Development

Sep 2022 – Present

- Designed, built, and published **Nurul Qur'an**, a Kotlin Multiplatform application, under a **Google Play developer account**; released the first version in September 2022 after a six-month build, with continuous improvements since.
- Gained hands-on experience with **Jetpack Compose, Kotlin Multiplatform, Clean Architecture, and modularization** through long-term independent application development and architectural experimentation.

EDUCATION & AWARDS

B.Sc. in Computer Science and Software Engineering

Inha University in Tashkent

Sep 2018 – Aug 2023

Tashkent, Uzbekistan

- Dean's List; ranked 1st among 337 students with a 4.5/4.5 GPA
- CGPA: 3.85/4.5
- **Highlighted coursework:** OOP, Algorithms, Artificial Intelligence, Database Systems, Operating Systems, Computer Networks, Software Engineering

LANGUAGES

English: Fluent

Uzbek: Native

Russian: B1
